A single-lens reflex camera (SLR) is a camera that typically uses a mirror and prism system (hence "reflex" from the mirror's reflection) that permits the photographer to view through the lens and see exactly what will be captured. With twin lens reflex and rangefinder cameras, the viewed image could be significantly different from the final image. When the shutter button is pressed on most...

In addition to the pentaprism viewfinder, one of the key features of any digital SLR camera is the ability to change lenses. Most people think that the camera alone is responsible for capturing an image, but this isn't the case.

While there are a handful of cameras to choose from, the number of lens options can be overwhelming. Digital SLR lenses come in all shapes and sizes and there is substantial price variation between them. Some are built for the demanding needs of professionals and others are just right for the everyday snapshot photographer.

(The Camera to Lens Compatibility Chart has been updated 12-JAN-2016 with the latest additions to the Nikon lineup, the D5 Pro FX DSLR and the long awaited D500, the DX successor of the beloved D300/D300s.) From time to time you find yourself reading great reviews on some lenses or see a bargain and ...

The company resumed camera production shortly after the war with the Semi Minolta III. This camera was equipped with a Rokkor 75/3.5 that was the first Japanese coated lens commercially available, and also the first lens made by the company for civilian use. The company also absorbed the optical section of the Toyokawa Navy Arsenal (Aichi prefecture), which became the Toyokawa (??) plant in ...
